

PowerMic™ II

Speech Recognition Hand Microphone for Use with
 Dragon® Medical 10, PowerScribe® for Radiology, and Enterprise Express®

The Dictaphone PowerMic™ II from Nuance is specially designed for enhanced physician productivity, providing ergonomic control of both standard dictation and speech recognition functions.

The PowerMic II microphone offers simplified, thumb-control operation for dictating, navigating, reviewing, and editing speech recognition generated documentation.

Full Dictation Control

The PowerMic II advances physician PC dictation to a new level, making it easier and faster to control voice recording, navigate and select fields in on-screen templates and standard reports, and move throughout recognized text reports for review and editing.

In addition to providing complete dictation control, the PowerMic II incorporates full-function, Microsoft® compatible, PC-Mouse capabilities into the microphone, to reduce the need for care givers to continually move between the microphone, mouse, and keyboard.

Features

- USB connectivity for easy plug-and-play installation as well as eliminating the need for sound card-enabled PCs.
- Integrated Barcode Scanner (optional model) for entering MRN, accession number, or other barcode-driven data, with audible feedback upon successful barcode scan.

Using the PowerMic II, users can rapidly navigate report template fields, then record and use “voice fill-in” capabilities to insert recognized text into report template fields. By combining an ergonomic hand microphone with PC mouse functions, physicians will gain new levels of dictation speed, ease-of-use, and productivity.

Flush, angled microphone element for user comfort and optimal recording level/signal.

Primary Dictation Controls
 Record, Rewind, Play, Fast Forward, Enter/Select

Transcribe Button to recognize speech or send dictation to a transcriptionist automatically, when physician self-completion is not utilized.

Tab-Forward/Tab-Backwards for speeding navigation through voice-driven templates and form fill-ins.

“Track-Point” Button and Left/Right “Mouse” Button to control the onscreen cursor, navigate and select functions.
